EUROPEAN CONTROL CONFERENCE

Connect with the European control community.

Immerse yourself in the field of automatic control and engage with academics and industry professionals at the 13th European Control Conference (ECC) in Strasbourg, France:

˅ Learn about the latest research in systems and control from internationally renowned experts in the field.

˅ Network with colleagues from across Europe and around the world.

˅ Enjoy yourself! The best of Strasbourg awaits you just minutes from the conference venue.

Call for proposals

We look forward to working with you to create an exciting ECC program for 2014. You are invited to submit your contributed paper, workshop or invited session proposal.

Conference format

The official language of the conference will be English for all written manuscripts and oral presentations. The conference proceedings will be included in the IEEE-Xplore digital library. In addition to regular sessions, the program will include plenary talks and workshops. Social and tourist programs will also be available.

Important dates

Submission deadline : October 7, 2013
Acceptance notification: March 3, 2014
Camera-ready due: April 28, 2014
Early bird registration ends: April 28, 2014

EUROPEAN CONTROL CONFERENCE

The 13th European Control Conference (ECC) will be held on June 24 – 27, 2014 in Strasbourg (France). ECC14 will be organized by the University of Strasbourg under the auspices of the European Union Control Association (EUCA). The conference will benefit from the scientific sponsorship of the IEEE Control Systems Society (CSS) and from the support of the major French research institutions CNRS, INRIA and GdR-MACS.

EUROPEAN CONTROL CONFERENCE
June 24-27, 2014 - Strasbourg, France

www.ecc14.eu

Strasbourg: the European Capital

Strasbourg is a European city *par excellence*. Located in France at the German border, it benefits from a strong European identity. It is the host of major European institutions: the European Parliament, the Council of Europe and the European Court of Human Rights.

UNESCO world heritage

The entire historic center of Strasbourg is listed as UNESCO world heritage. Its monumental cathedral features carvings as delicate as any piece of lacework.

So much to visit...

Take a boat tour or stroll the pedestrian pathways around the Cathedral and in the Petite France. There is so much to see: Maison Kammerzell, place Gutenberg, St.-Thomas church, the former tanners' houses, the Covered Bridges, the Vauban dam, the former customs-house, the former town-butchery, the Palais Rohan, etc.

Conference venue

Strasbourg Convention Center is perfectly scaled for hosting ECC. Located close to the city center, it is easily accessible by tram and is just 20 minutes from the airport by taxi.

Travel, Transportation and Hotels

Strasbourg International Airport connects the city to over 200 destinations worldwide. The airport is only 9 minutes away from Strasbourg Railway Station in the city center. The city is also accessible by shuttle from 3 other international airports (Frankfurt, Basel-Mulhouse and Karlsruhe/Baden-Baden) and connected by TGV high-speed trains to numerous major European cities (Paris, Marseille, Zurich, Munich, Stuttgart, etc.).

Strasbourg enjoys an excellent modern public transportation network featuring the tram as the most popular, most effective and most comfortable way of getting around town.

Strasbourg and its surroundings have a global capacity of 7,000 rooms, most of which are located in the city center only 15 minutes away by tram from the Convention Center. Special rates for ECC14 attendees will be available. For more information, please contact *Strasbourg Tourism Office*: www.otstrasbourg.fr

Conference Topics

Topics include, but are not limited to:

- Adaptive systems
- Autonomous systems
- Biological systems
- Computational methods
- Control applications
- Control education
- Discrete event systems
- Distributed parameter systems
- Emerging control theory
- Fault detection
- Finance
- Hybrid systems
- Intelligent systems
- Large-scale systems
- Learning systems
- Linear systems
- Micro and nano systems
- Modeling
- Networks & communication
- Nonlinear control
- Optimization
- Process control systems
- Signal processing
- Stochastic systems
- System identification
- Uncertain systems
- Verification & validation
